

## Red List Materials and Chemical Content

deko markerboards contain no added urea formaldehyde (NAUF), polyvinyl chlorides (PVC) or any material or chemical currently noted on the LPC Red List (Living Furniture Challenge 2.0).

## Recycled Content

33.66% post consumer  
18.66% pre consumer

## Low Emitting Material

Certified Clean Air Gold

## Responsibly Manufactured in Minnesota, USA

deko continuously strives to conserve energy and minimize the resources used during our manufacturing process. deko uses or recycles all waste materials possible that are created in the manufacturing process.

## Packaging and Shipping

Because deko is strong and lightweight, up to 30 deko boards can be shipped together in a single crate. This greatly reduces the embodied energy, packaging materials needed, and shipping costs per board. deko also uses recyclable packaging materials wherever possible, and has a crate return program in place.

## End of Product Life

deko markerboards are designed to perform for the life of your building. Should a deko markerboard need to be disposed of for any reason, all of deko's markerboard components are fully recyclable.
